524 1. Claims 1-107 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

527 Claims 1-107 recite and amount effective "to measurably regulate body weight," "effective to measurably increase or decrease the body weight" etc. The meaning of "regulate" or "increase or decrease" body weight in this context is unclear. Animals can already "regulate" body weight to some degree. Also, an animals body weight is always increasing or decreasing. Drinking increases body weight and waste elimination and perspiration reduces body weight. It is unclear how one distinguishes background weight regulation from specific effects derived solely from the claimed method.

It is also unclear how one method can both "increase" body weight and "decrease" body weight. If clarification is difficult, it is suggested that methods be claimed that either "increase" body weight or "decrease" body weight.
